ABOUT THIS PROGRAM

Earn your BSN in an online format designed to put students first. Engaged faculty are here to help you build on your foundation as an RN and take your career to the next level with courses focused on leadership, public health, and patient advocacy. We offer this sequence entirely online to make it easier to fit within a busy RN's schedule. Further, no chemistry or statistics coursework is required to enroll.

Take your career to the next level with courses focused on leadership, public health, and patient advocacy.

FULL-TIME FACULTY, HERE TO SUPPORT YOU

The faculty who teach the Online RN to BSN program are the same faculty who teach our on-campus BSN programs. Your education is their full-time priority, and they encourage student meetings, on campus or online. Plus, faculty are Quality Matters certified.

ONLINE PROGRAM, ON-CAMPUS PERKS

Our online students are full-on Redbirds. They can study at Milner Library, receive MCN tech support, study abroad with Transcultural Nursing, take part in Leadership Academy, cross the stage at graduation, and more.

QUALITY CURRICULUM, ANNUALLY REVIEWED

Build on your core nursing knowledge with courses in evidence-based practice, leadership, and more. Plus, our faculty review course content together annually to ensure our program continues to evolve and meets the needs of 21st century nursing.

BENEFITS FOR STUDENTS OF COLLEGE PARTNERS

ADN students at our college partners can apply for pre-admission into our Online RN to BSN program. Pre-admitted students can enroll anytime up to 2 years after they graduate. Dual Enrollment is also available with select partners, which gives students a customized plan of study to take BSN classes at ISU while they finish their ADN.

WAYS WE SUPPORT AFFORDABILITY

Illinois State University extends the in-state tuition to our neighboring states. Additionally, students admitted to the nursing major can apply with one application to nearly 100 private scholarships every spring.
